You may know the fact that octopuses have 8 arms and 3 hearts, and their blood is blue. They are very smart; there was once an octopus that can **predict** the World Cup winners correctly. However, have you ever tried Sannakji? It is a Korean dish, which is to eat baby octopuses alive. The octopuses are still moving when people eat them. People usually eat the dish with sesame oil. If you don't chew them carefully, the octopuses may stick to your mouth and **choke** you. In 2010, a woman in South Korea stopped breathing after eating a live octopus, and died 16 days later in the hospital. In 2019, a

Chinese vlogger tried to eat a live octopus, but was attacked by it. The octopus stuck to her face and thus she could not breathe at all. She tried really hard to get rid of it, and luckily, she succeeded. It was really dangerous. Therefore, experts suggest not to eat live octopuses. If you still want to eat live octopuses, you'd better cut them into small pieces.
